- Range to 1000ft.
- Depth to 4 ft.
- Receiver Volume Control.
- Standard 33khz Tracking Signal.
- Ground Stake Included.
- Transmitter Automatic Off Switch.
- Uses 8 C Batteries and one 9 volt (not included)

FEATURES

The Armada Pro290 Wire Locator is a new tool for contractors working with shorter cables like CATV and telephony drop wires. The Pro290 consists of a transmitter and receiver and uses a limited power output to protect sensitive electrical equipment. The Pro290 uses an easy to track 33khz frequency, and sets up in less than a minute.

Simply connect the Pro290 to the wire to be tracked and to the ground stake in dirt, get a good ground indication, and track the beeps with the hand held receiver. It's that easy.

Finding breaks in wires is easy too. When tracking a wire path, the signal will end when the path ends. This could be the end of the string or wire but additionally, can indicate where a wire has been cut.

SPECIFICATIONS

Power Requirements: Transmitter – (8) C batteries; Receiver – (1) 9V battery

Transmitter Frequency: 33Khz

Transmitter Power: 100 mw @ 1K Ohms

Weight: 4 Lbs with case

Warranty: 12 Months

Box Contents: Transmitter, Receiver, Ground Stake and Antenna.
